

Root Zero Technologies LLC

Full-blueprint, patent-filed, no-fuel homes and transport engines build ready.

Seeking engineers, partners, angel investors, and like-minded supporters
to help prototype, launch, and share in a trillion dollar industry.

Contact (founder): Adam Lee Pellegrino

<https://www.gofundme.com/u/root-zero-technologies>

I'm **Adam Lee Pellegrino**, the founder of **Root Zero Technologies LLC**.

I've filed full patents for a pair of **no-fuel, free-energy, full-scale, build-ready engines** for homes, transport, and more. These systems do **not require fuel, batteries, or solar**. They are like Nicola Tesla tech brought to engines without his outside energy coil. The engines themselves generate extremely high energy levels, yet have zero moving parts.

What does this mean in terms of Root Zero Technologies LLC claims. If the prototypes work as expected, it means cars will no longer need gas, homes will have no need for electric bills, energy scarcity will become a thing of the past, nobody has to be reliant upon centralized energy ever again. This is green energy tech, it doesn't require rare earth elements. Whatever countries war over, doesn't need to include energy.

(Generates Electricity — No Gas, No Lithium, No Exhaust, No Charging, No Physical Grids, Silent)

Root Zero Technologies LLC has designed what billions have been waiting for but were told could never exist. The **Bloom Engine systems** are the **first and only known technologies** that:

- **Meet and exceed global climate commitments** without reliance on extractive mining or fragile supply chains
- **Eliminate energy scarcity** for homes and transport without requiring state-imposed sacrifice
- **Enable rapid adoption by nations, cities, or individuals** through incentive-based rollout — not mandates
- **Operate quietly, cleanly, and safely** across extreme conditions — including disaster, off-grid, remote use
- **Empower low-income nations to leapfrog directly into post-scarcity energy** without debt
- **Scale easily for space, transport, agriculture, emergency response, and infrastructure resilience**
- **Work now** — they do not require further theoretical breakthroughs or decades of R&D

Root Zero Technologies LLC is seeking partners with the skill, vision, and drive to bring this to life. For the smallest prototype engine product resources are estimated to cost between \$2,800 to \$3,000. I estimate that a capable engineer could build the first unit in under two weeks. Full mesh-grid testing will take slightly longer.

I'm operating with **zero institutional funding**, living under threat of eviction, yet the engines are complete and provisionally patented. I **refuse to sell out** to bad actors or risk this tech being buried. If you are an engineer, journalist, backer, or just someone who wants to be a part of this—you may contact me through Root Zero Technologies LLC's GoFundMe. Provide your email address and what your interest is. In response you will receive a way forwards.

⚡ Root Zero Technologies – Bloom Engines

Concept rendering of Bloom Zero core unit.
Full schematics available under NDA.

Resilient Energy in Extreme Disasters

Comparing Traditional Response vs. Bloom Engine Network

Major Hurricane Scenario	Bloom Network
Area Blackout 	Local Power Sustained
<ul style="list-style-type: none"> Fuel Shortages Overloaded Shelters Aid Delays 	<ul style="list-style-type: none"> ACTIVE BLOOM UNITS Off-Grid Shelter Power Critical Systems Online <p>Bloom Units Keep Community Powered During Crisis</p>

Standard Response	Bloom Network
Grid Down 	Safe Zones Powered
<ul style="list-style-type: none"> Evacuation Delays Water Pump Offline Comm Failures 	<ul style="list-style-type: none"> EMERGENCY POWER HUBS Evacuation Centers Lit Pumps & Comm Active <p>Bloom Hubs Power Safe Zones Despite Grid Failure</p>

Winter Severe Blackout	Bloom Network
Power Loss 	Heat & Power Stable
<ul style="list-style-type: none"> Heat Failures Medical Risk Aid Delays 	<ul style="list-style-type: none"> Homes Heated Medical Sites Powered Stable Energy Mesh <p>Bloom Grid Maintains Power Through Storm</p>

Bloom Units Provide "Power When All Else Fails."

How Bloom Replaces the Grid

GRID DEPENDENCE	BLOOM ENGINE INSTALLATION
<ul style="list-style-type: none"> ✗ Monthly Bills ✗ Pollution / Blackouts ✗ Utility Control 	<ul style="list-style-type: none"> ✓ No Bills ✓ Clean / Always-On ✓ Energy Freedom

GRID DEPENDENCE	BLOOM ENGINE INSTALLATION
<ul style="list-style-type: none"> ✗ Monthly Bills ✗ Pollution / Blackouts ✗ Utility Control 	<ul style="list-style-type: none"> ✓ No Bills ✓ Clean / Always-On ✓ Energy Freedom

⚡ The blueprints are complete. None of this requires more to figure out. Let's build these engines.

It Doesn't Have to Be Like This – Is This Really What We Want?
